

Steps for Making a Shaker Card:

Before following these instructions please first watch the YouTube video located here: <https://youtu.be/J8wzJmfeO4c>

Supplies

You will need the following supplies:

- Cardstock and/or Designer Series Paper in color of your choice
- Foam Adhesive Strips (141825 <http://bit.ly/2arGtV6>)
- Window Sheets (142314 <http://bit.ly/2ab7ZVb>)
- Embossing Buddy (optional) (103083 <http://bit.ly/2aqv89Q>)
- Framelit or Punch of your choice
- Something fun to fill the shaker card, such as glitter, sequins, or stamped images.

Preparing your card stock

To prepare your cardstock, cut the following:

- Card base (usually measuring 5 ½ x 4 ¼ or 8 ½ x 5 ¼ and scored in half and folded)
- Card stock to layer over the top of the card (Ex. 5 ¼ x 4 or measurement of your choice)
- Window Sheet cut slightly larger than the Framelit or Punch that you'll be using to create a hole in the layer above. There's no need to cut the window sheet to any special shape. Cut it in a square or rectangular shape (see video).
- Card stock or Designer Series Paper to layer behind the Window Sheet. Cut this slightly larger than the Framelit or Punch.

Below are the steps for assembling your Shaker Card:

Step 1	Cut a hole in the top layer of card stock using a framelit or punch of your choice.
Step 2	Decorate the top layer of the card. Do your stamping now because after your assemble the shaker, you won't be able to stamp the card. If you plan to stamp the paper that will go behind the shaker card, do that now, too.
Step 3	Adhere the Window Sheet (acetate) under the cut out image.
Step 4	Put on the Foam Adhesive Strip
Step 5 (Optional)	Run Embossing Buddy around the Foam Adhesive Strip so that items don't stick.
Step 6	Fill the Foam Adhesive Strip with glitter, sequins, or stamped images.
Step 7	Put paper (either a stamped image or designer series paper) over the Foam Adhesive Strip
Step 8	Adhere to card base using Foam Adhesive Strips.
